17:00 - 19:00

Employability Skills Reflection

Ms Sotiriadou Anna
Associate Professor, Head of the Computer Science Department

Mr Thanos Hatziapostolou
Associate Professor, Computer Science Department

Employability can be thought as a set of skills, understandings and personal attributes that make graduates more likely to gain employment and be successful in their chosen occupations. Developing employability often means using reflection to make the most of experiences. In other words, reflection can help someone in identifying skills that have been utilized and developed through experiences and in turn build your sense of self-awareness which can be effectively communicated to others. Using the Sheffield Graduate Attributes, this seminar aims to help you reflect on the employability skills that you have developed through the experiences that were offered to you during your academic studies.

Knowledgeable

Ethical

Information & Digitally Literate

Lifelong Learner

Reflective & Self Aware

Professional & Adaptable

- Participation is compulsory for Level 3 CS students
